Check your voice mail.

Thanks. We need to find out the exact location of the Plant. It is being represented as ours and an investigation. Can you get that information?

Ethan is on it
!! :) fix

I spoke to Lilly at the steam plant this eve. She said that she was the one who removed the soil and gave it to Lorna Dove. She said she took it from City Light property, not airport property. She wanted me to pass along that she would be happy to tell me more about this any time. Hope this helps.

master plan web page

tion, indicated by Lilly, it came from.

Thanks. We need to find out the exact location of the soil removal, even if Lilly says it came from the Steam Plant. It is being represented as ours and will be likely to arise in a lawsuit, so we need to do our own investigation. Can you get that information and provide me with a site map locating it. Thanks.

Paula and I both spoke to Lily at the Steam Plant. She admitted to getting a sample of the dirt for Lorna Dove. (Lorna was not on the airport) She believed at the time that she was obtaining the sample from a portion of the pile which was infringing on the City Light water line easement. She showed me the location, which was about 6-8 feet southeast of their water meter vault. I have placed a map on your desk, with the location "x-ed" and circled in red. Also, Lily stated that David Flores of City Light has some very accurate maps of the area, including all easements if this situation needs further follow-up. His number is (206) 684-3337.
